

The First Week AI Business Plan

For Adults 50+ · The \$200/month tool stack + mindset + 7-day plan

By Brian McKinney · Founder, Learn More Technologies

THE PREMISE

The same AI tools being used to downsize experienced workers are the exact tools that let one experienced person build and run an entire business assistant for under \$200 a month. You don't need a team. You need the stack, the mindset, and seven days.

THE \$200/MONTH TOOL STACK

Tool	Cost	Purpose
Claude Pro or ChatGPT Plus	\$20/mo	Your AI business partner — strategy, writing, research
Canva Pro	\$15/mo	Visuals, decks, social graphics
Google Workspace	\$7/mo	Email, docs, calendar, storage
Calendly	\$10/mo	Booking and scheduling
Domain + hosting	\$15/mo	Your online home
Buffer	\$15/mo	Social scheduling without the grind
Stripe	Free + 2.9%	Get paid
Notion or Airtable	Free tier	Run your operation

Total: roughly \$82–\$200/month depending on your stack.

THE MINDSET

- Your experience is not a hurdle. It is your launchpad.
- You don't need permission. 52.3% of U.S. businesses are owned by people 55+.
- AI is not replacing you. It is force-multiplying you.

THE 7-DAY PLAN

Day	Action
1	Pick the problem you know how to solve. Write it in one sentence.
2	Set up your tool stack. Claude or ChatGPT, Canva, Calendly, Google.
3	Build your offer page. One page. One offer. One price.
4	Draft your first 3 LinkedIn posts. Use AI to draft. Your voice to finish.
5	Post. Message 10 people who might need what you offer.
6	Take your first call. Free if needed. Proof over price this week.
7	Deliver. Ask for a testimonial. Repeat next week.
